

Past, Present, & Future

Today is today

Tomorrow is Tomorrow

Live in this particular moment

Live it well

For whatever you do today will affect what you will be tomorrow

Do not let your past hold you back, yesterday is now in the past, it is history

Though History seems to rule some people's life, do not let History control yours

The future can only be bright if you make it bright

There's no guarantee you will live to see tomorrow's sunrise

So live every second to the fullest!

And so if you do die tomorrow you'll have no regrets
